

Znode v9.7.6 Breaking Changes			
Jira ID	Project Name	File/ Method/ Property/ Table/ Stored Procedure Name	Breaking Changes
ZPD-22183	Database	Znode_ImportCustomer	For customer import and sales reps import "Znode_ImportCustomer" SP will be used based on the IsSalesRep parameter which will change internally on Sp based on ZnodeImportHead value. Store selection is only for Customer Import we have handled this using flag. IsSalesRep flag value will be set as 0 for customer import and 1 for sales reps import. While importing sales reps account data will be insert and update in ZnodeUser, ZnodeUserPortal, AspNetZnodeUser, AspNetUsers, AspNetUserRoles, ZnodeUserProfile tables based on flag value. Data will not insert and update in the below table while importing sales reps accounts: ZnodeAccountUserPermission, ZnodeUserGlobalAttributeValue, ZnodeUserGlobalAttributeValuelocale, ZnodeProfile, ZnodeDepartmentUser, ZnodeSalesRepCustomerUserPortal. New column is added in the ZnodeImportTemplateMapping table for "SalesrepsUserName" in customer template. Inserting data in the ZnodeSalesRepCustomerUserPortal and AspNetUserRoles table.
ZPD-23097	Znode.Engine.Webstore	StoreLocator.ts ,StoreLocatorMap.js	Added parameter in initMap method
ZPD-22905	Znode.Admin.Core	Helpers/HelperMethods.cs	Removed the following Methods DatePickDateFormat() ConvertStringToDate() GetDateTime() SearchDateFormat() Renamed the following Methods GetDefaultTimeZnode() method has been renamed to GetDefaultDisplayTimeZone(). ToGlobalTimeZone() method has been renamed to ToDisplayTimeZone()
	Znode.WebStore.Core	Helpers/HelperMethods.cs	Removed the following Methods DatePickDateFormat() ConvertStringToDate() GetDateTime() SearchDateFormat() Renamed the following Methods GetDefaultTimeZnode() method has been renamed to GetDefaultDisplayTimeZone(). ToGlobalTimeZone() method has been renamed to ToDisplayTimeZone()
	Znode.Libraries.ECommerce.Utilities	Helpers/HelperUtility.cs	GetDefaultGlobalDateTimeFormat() method has been renamed to GetGlobalSettingFeatureValue().
	Znode.Libraries.Data	Extension/EntityExtension.cs	Removed the following Methods. ToSiteConfigEntityUtcDateTime() ToSiteConfigEntityLocaleDateTime() GetDefaultGlobalSettingData() GetTimeZoneInformation()
			The new HelperUtility.GetDateWithTime() function should be used instead of DateTime.Now for getting the current DateTime value according to the Saved Time Zone.
			The HelperMethods.GetDisplayDateTime() function should be used instead of DateTime.Now for getting the DateTime value according to the Display Time Zone.
	Database	Fn_GetDate	Change behavior to get current datetime based on saved-timezone feature value
ZPD-18964	Znode.Webstore.Core	UserAgent.cs/Logout(ExternalLoginInfo loginInfo)	This method is deprecated. As logout of external login is handled in another existing Logout() method.
		OrderController.cs/GetShoppingCartItems	Added int profileId = 0 in the GetShoppingCartItems, CalculateShoppingCart, and RemoveAllShoppingCartItems Controller methods.
		OrderController.cs/CalculateShoppingCart	
		OrderController.cs/RemoveAllShoppingCartItems	
		QuoteController.cs/UpdateQuoteCartItemPrice	

ZPD-22637	Znode.Admin.Core	CartAgent.cs/RemoveCartItem	
		CartAgent.cs/RemoveAllShoppingCartItems	
		CartAgent.cs/GetShoppingCartByUserId	
		CartAgent.cs/GetShoppingCart	
		CartAgent.cs/GetCartFromSession	
		CartAgent.cs/CalculateShoppingCart	
		CartAgent.cs/MapCartParameterModel	
ZPD-12597,ZPD-10292	Znode.Engine.Admin	Znode.Engine.Admin\Scripts\Core\Znode\Order.ts	
		Znode.Engine.Admin\Scripts\Core\Znode\Quote.ts	
		Znode.Engine.Admin\Views\Order\CreateOrder.cshtml	Added hdnProfileId in the above view
	Znode.Engine.Api.Client	UserClient.cs	Added a method GetAccount for common use in existing method
	Znode.Engine.Api.Models	Added DomainLocaleModel.cs and DomainLocaleResponse.cs	
	Znode.WebStore.Core	BaseAgent.cs	1.used method GetAccountByUserAndPortalId() instead of GetAccountByUser() for passing portal id. 2. removed access specifier static from ZnodePublishStatesEnum GetPublishState() and refactor code
	Znode.WebStore.Core	PortalAgent.cs	Overloaded ChangeLocaleByIdAndCode () instead of ChangeLocale() and replaced new method in route config
		_Locales.cshtml	In _Locales.cshtml added ChangeLocaleByIdAndCode instead of ChangeLocale
